

Design Brief: To build a hedgehog house

I am designing a house to create a safe place for a hedgehog to shelter on my allotment.

What materials I will need	What equipment I will use
<ul style="list-style-type: none"> - Wood - Nails - Screws 	<ul style="list-style-type: none"> - Hammer - Saw - Drill - Screwdriver - Sandpaper - Pencil - Tape measure - Ruler

My Evaluation

I chose to use design 1 because there was a tunnel leading to a hidey hole that I thought the hedgehogs would like. It would also be good to keep the wind away from the hedgehogs.

I learnt how to use a saw with the help of my dad.

I strimmed the grass in the corner of my allotment as that was the best place to put the hedgehog house being as there is a gap in the fence and a hedgerow close by. I secured it and covered it in twigs and leaves.

I enjoyed making it outside in the sun, using the saw and drill. I least enjoyed using the hammer because of the deafening noise it made when it hit a nail.
