

“Let your light shine.”

SCIENCE

Agreed consistencies and experiences

1	<i>All lessons will begin with retrieval opportunities. This reinforces learning from previous weeks and months to aid long term memory.</i>
2	<i>Where possible, lessons should involve as many practical hands-on elements to enhance scientific enquiry skills and learning.</i>
3	<i>Each topic will have a specific knowledge organiser stuck in Science books so children can refer to this to support their learning.</i>
4	<i>During British Science Week children will experience a Science day, focused on the weeks theme.</i>
5	<i>Classroom displays will reflect vocabulary and knowledge for current topics.</i>
6	<i>Children in KS1 and KS2 will go on a science themed educational visit to a museum or similar, once a year. Alternatively, a visiting speaker could come into school.</i>
